# How to upgrade Ariva @Link 200 receiver?

Ferguson offers software upgrade capability for your Ariva using USB portable memory. After you have completed software upgrade, your receiver will typically perform better. What improvements are made depends on the upgrade software you are using as well as the software your receiver contained before the upgrade. You can execute the software upgrade procedure yourself. Be aware that the content of this document is addressing technical or software skilled users.

(1) Copy software file **update.tgz** to the root directory of the USB portable memory.
(2) Plug USB portable memory into USB port of receiver.
(3) Go to Menu-> Installation-> USB update

(4) Press **Yes** to upgrade receiver

(5) Please wait... After upgrade done successfully receiver will go stanby automatically.

# Wait about 5 minutes and then turn on the receiver using the POWER button on the front panel.

(6) After the upgrade we recommend that you restore the factory settings and re-search the channel list.
